HIGHLIGHTS AND MAJOR EVENTS

FINANCIAL YEAR 2014

Our business volume has continued to grow in 2014 with increasing focus on the internationalisation strategy defined earlier. Net profit for the year was on a level with our estimate and is satisfactory. Some of the highlights are:

- Net profit for the year after tax was DKK 100.4 million in 2014 against DKK 139.7 million in 2013.
- With an average rate of return on equity of 21.0 per cent, shareholders' equity was DKK 507 million at year-end 2014.
- The group's own funds totalled DKK 404.3 million at year-end 2014. With a capital ratio of 43.8 per cent this is considerably higher than the statutory minimum requirement, and the group continues to be very financially solid.
- In early 2014 the group opened a representative office in London with the purpose of selling the group's products to international clients.
- In the reporting period, the group also set up in Singapore, Indonesia and Peru and is now represented in six countries in total.
- Maj Invest Asset Management has experienced a boost in the number of clients in all client segments.
- Several of Maj Invest Asset Management's products have showed high performance, also in an international perspective.
- Investeringsforeningen Maj Invest (mutual fund) stayed on the growth track of previous years and is now past DKK 10 billion in assets.
- Maj Invest Equity provided consultancy services in connection with the sale of three companies and Maj Invest Equity 4 K/S' investments in the chain of dental clinics Godt Smil, the design company Muuto and ProLøn.
- Maj Invest Equity A/S has obtained alternative investment fund manager approval from the Danish Financial Supervisory Authority.
- Maj Invest Equity International provided advisory services on an investment for the microfinance fund and the sale of a portfolio company for the Vietnam fund.

CORPORATE DEVELOPMENT SINCE OUR START IN 2005 Since setting up business in May 2005, the group has developed favourably in terms of both business volume and number of clients. The group has two core business activities, asset management and private equity. With the opening of a representative office in London, the group continues to see a rise in the level of activity with enhanced focus on international activities. The representative office has been set up with the purpose of selling the group's products to international clients. In addition, the group has set up in Singapore, Indonesia and Peru to support Maj Invest Equity International's activities. With its recent establishments, the group is now represented in six countries.

The development in our activities can be seen in Milestones on the next page.

The group has two principal business areas: Maj Invest Asset Management and Maj Invest Equity, whose products supplement each other.

- Maj Invest Asset Management provides advisory services on asset allocation and asset management (listed securities). Our clients are institutional investors, Investeringsforeningen Maj Invest (mutual fund) in Denmark, and the mutual fund Maj Invest Funds in Luxembourg.
 - Maj Invest Formueforvaltning (wealth management) provides advisory services on wealth ma-

nagement to wealthy clients, companies and funds.

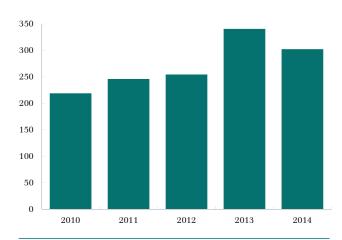

- Maj Invest Investor Relations & Markets is responsible for stock exchange trading and handles group client relations. The department also supplies distributors with information on Investeringsforeningen Maj Invest and prepares promotional products for financial institutions.
- Maj Invest Equity provides investment advisory services to private equity funds investing in unlisted equities in Denmark and abroad. In Denmark we extend our services to four funds and provide discretionary investment advisory services in respect of portfolios of unlisted equities.
 - Maj Invest Equity International provides investment advisory services to three funds that carry out activities in Vietnam and Southeast Asia as well as within microfinance.

Total assets under management constituted approximately DKK 35 billion at year-end. In 2014 the group employed an average of 95 employees.

We are currently adapting the range of products and services we offer, and as a part of the group's international strategy we focus on selling selected products to international clients.

DEVELOPMENT IN BUSINESS AREAS

INVESTMENT PHILOSOPHY

We focus on long-term value creation for our clients, because the short-term development is driven by unpredictable factors.

MAJ INVEST ASSET MANAGEMENT

Maj Invest Asset Management offers services encompassing advice on portfolio and investment decisions and asset management of listed products extended to large professional clients and institutional investors.

Our advisory function builds on a long-term strategy based on analyses of structural conditions and scenarios in global financial markets. The key concepts of our strategy are risk diversification and risk analysis, as expressed in our analyses of trends and themes in the financial markets.

The products offered by Maj Invest Asset Management have generally performed well compared with benchmarks and also shown noteworthy results in an international perspective.

At year-end 2013 Maj Invest Asset Management launched investment advisory services in emerging markets equities through a mutual fund residing in Luxembourg, and at year-end 2014 Maj Invest Asset Management further launched investment advisory services in value equities in the same Luxembourgbased mutual fund. This combined with a high performance compared with benchmarks has resulted in an increase in assets under management. Thus, assets under management in global value equities increased by 32 per cent in all client segments whereas assets under management in emerging markets equities rose by 39 per cent in all client segments.

Together with investors it was decided to close the longshort equity fund sin AI, which was based on neural network technology, in the first half of 2014. The decision was made as a result of returns not living up to expectations.

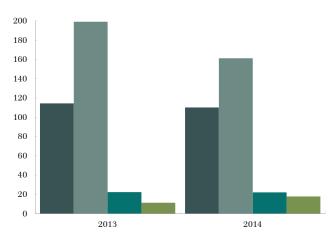

In the period under review, Maj Invest Asset Management has seen a fair increase in the number of new clients. However, total assets under management fell DKK 4 billion to DKK 30 billion in the reporting period. This decline in assets under management can be attributed to the fact that Maj Invest Asset Management did not win a large fixed-income mandate already under management. Isolated, this has resulted in a decline in assets under management of DKK 10 billion compared with last year. Disregarding this, assets under management rose by 25 per cent in 2014.

INVESTERINGSFORENINGEN MAJ INVEST (MUTUAL FUND)

Maj Invest Asset Management acts as investment advisor to Investeringsforeningen Maj Invest, Denmark's second largest independent mutual fund. Investeringsforeningen Maj Invest consists of eleven funds.

NET INTEREST AND FEE INCOME, MARKET VALUE AND CURRENCY TRANSLATION ADJUSTMENTS AND OTHER OPERATING INCOME

INTERNATIONAL CLASS

Measured in terms of return since launch at year-end 2005, the Maj Invest Pension fund ranks 20 out of 517 balanced funds offered in Europe within the Morningstar category Balanced EUR Moderate Risk - Global. Maj Invest Pension ranks third compared to the funds offered to private individuals in Denmark.

The fixed-income funds Maj Invest Danske Obligationer and Maj Invest Obligationer rank 4 and 7, respectively in their Morningstar categories on a nine-year basis among all European mutual and other funds. Compared to funds offered to private individuals in Denmark, Maj Invest Obligationer is taking the lead.

The global equity funds Value Aktier and Aktier rank 8 and 49, respectively, in the same period among 744 mutual and other funds in Europe in the category Global Large-Cap Blend. Compared to the funds offered to private individuals in Denmark, Maj Invest Value Aktier is taking the lead in the category whereas Maj Invest Aktier ranks 5.

Note: Return after costs in the period 1/1-2006 to 31/12-2014. Only funds with a track record covering the entire period are included. Source: Morningstar Direct.

In 2014 the mutual fund fortified its position as an independent alternative to the banks' mutual funds by ensuring sound investment results. This together with net new sales increased the fund's assets by DKK 2.0 billion to DKK 10.4 billion.

With assets under management growing by 23 per cent, Investeringsforeningen Maj Invest gained market share in the Danish retail market, which grew by 14 per cent.

From the perspective of the funds' Morningstar KategoriTM, the actively managed funds with a long track record have outperformed benchmarks since the launch of the mutual fund. Morningstar® is an international

investment research firm assessing returns and risks in mutual and other funds.

At year-end 2013 Investeringsforeningen Maj Invest launched the Maj Invest Emerging Markets fund. While many competing products focus on large countries such as Brazil and China, our emerging markets fund also looks at opportunities for the next generation of emerging markets countries, including Indonesia, Vietnam and Mexico. The philosophy of the fund is to make selective investments in quality companies expected to generate both earnings and growth, and which carry out business activites in favourable macroeconomic climates. In 2014 the fund welcomed 3,600 new investors and increased assets to DKK 500 million as a result of a great interest from both distributors and independent investors.

On 12 March 2014 the independent investment research firm Morningstar awarded the Maj Invest Danske Obligationer fund (Danish bonds). The fund received a Morningstar Fund Award and won in the

DEVELOPMENT IN ASSETS

category "Bedste Danske Obligationer" (best Danish bonds). This is the third time that the Danske Obligationer fund is awarded by Morningstar, also winning in 2011 and 2013.

Notes: Performance since establishment is shown in relation to the comparison index of the individual fund. The Pension, Kontra and Makro funds do not have an official comparison index. Performance in relation to Morningstar Kategori™ is calculated based on the comparable category of (and data from) Morningstar®, which includes comparable funds in Europe. Performance in relation to Morningstar Kategori™ is calculated on a month-by-month basis since launch and until 31 December 2014.

- 1) Per annum since the launch of the individual funds.
- 2) Launched 16 December 2013.
- 3) Performance compared to Morningstar KategoriTM since the portfolio's shift to current investment focus on 28 February 2013.
- 4) Returns in 2013 concern the period from 22 March 2013 to 31 December 2013.

Seven of Investeringsforeningen Maj Invest's funds have more than a three-year track record within their investment area and are thus rated by Morningstar. At year-end the Danske Aktier fund achieved a two-star rating whereas the funds Europa Aktier and Aktier both achieved a three-star rating. The fixed-income fund Danske Obligationer achieved a four-star rating whereas the funds Value Aktier, Obligationer and Pension all achieved five-star ratings. Five stars place the fund among the top ten per cent in its category in Europe. The remaining four funds have not been rated as they have either changed category or have been launched within the last three years and are thus not rated.

Morningstar's evaluation and rating show that the advisory services provided by Maj Invest Asset Management to Investeringsforeningen Maj Invest create stable results and label Investeringsforeningen Maj Invest's funds as quality products matching competitive products.

The objective is for each fund to offer high quality and achieve good results. Overall, the rating places Investeringsforeningen Maj Invest as the best mutual fund in Denmark at year-end 2014 when it comes to the average number of stars achieved.

MAJ INVEST FORMUEFORVALTNING (WEALTH MANAGEMENT)

Maj Invest Formueforvaltning provides wealthy clients with advisory services concerning asset allocation and asset management of listed securities and funds. The key concepts are a stringent investment process with solid focus on risk management and long-term asset savings for clients.

Maj Invest Formueforvaltning supplements other corporate activities and draws on both the group's asset management and analytical skills when advising clients.

In 2014 our wealth management business developed favourably once again in terms of the number of clients as well as assets under management.

As a result of healthy returns as well as influx of clients and expansion of the business volume with existing clients, the performance-based fees were also in 2014 on a satisfying level.

The upturn is expected to continue over the years to come.

MAJ INVEST INVESTOR RELATIONS & MARKETS Investor Relations handles group client relations by being the communication link between clients and investment staff. The department is the hub from which we enter into distribution agreements and provide distributors with information about Investeringsforeningen Maj Invest.

The department provides services to existing group clients and also focuses on outreaching sales work in relation to potential new clients. This has resulted in a cumulative inflow of new client contracts in the period under review.

Investor Relations has been the hub from which the expansion of the Luxembourg-based mutual fund Maj Invest Funds has taken place in 2014, enabling investments in global value equities in addition to emerging markets equities.

Maj Invest Markets trades in both Danish and foreign equities. Our Markets department provides services to professional investors and is an authorised Nasdaq OMX Nordic stock exchange trader.

Maj Invest Markets offers professional advisory services building on many years' experience in investment consultancy and securities trading with a competitive price structure. We offer professional advice about equity investments based on the client's profile and requirements and underpinned by comprehensive analyses, superior professional qualifications and a high degree of service. We attach great importance to long-term client relations, making it our mission to collaborate with and create value for our clients.

Our clients have access to information and other advisory material regarding developments in the financial markets. Our arrangements with large international investment banks also enable Maj Invest Markets to offer advisory services on and trade in foreign equities. As part of our service we also provide information about the various funds of Investeringsforeningen Maj Invest (mutual fund).

Maj Invest Markets' market-making activities have grown in recent years. In addition to being a market maker for all funds of Investeringsforeningen Maj Invest (mutual fund), Maj Invest Markets is a market maker in respect of the equities of listed companies.

MAJ INVEST EQUITY

Maj Invest Equity provides advisory services on investments in unlisted equities, primarily through consultancy arrangements with our private equity funds LD Equity 1, 2 and 3 and Maj Invest Equity 4 and via a consultancy mandate for large clients.

In the four private equity funds, Maj Invest Equity invests in unlisted Danish companies (private equity), and the investment strategy differs from that of most other private equity funds in Denmark by also investing in minority interests, albeit minimum 30 per cent. Maj Invest Equity focuses on small and medium-sized enterprises with revenues between DKK 100 million and DKK 1 billion (with emphasis on DKK 200-700 million) operating in industry, trade and services, particularly in sectors such as food, health, environment, energy and technology.

Investments are based on a number of criteria centred on enabling Maj Invest Equity to help create value. Investments are typically made in companies in which the existing group of owners wishes to net a profit and take the company to the next level in cooperation with a dynamic partner. Basically, this demands a considerable potential for operational and industrial value creation with a strong management and organisation also geared for change. Maj Invest Equity has focus on an in-

MAJ INVEST EQUITY - NIELS TOFT, PARTNER; NIELS RETBØLL, PARTNER; ERIK HOLM, MANAGING PARTNER; JAN HOVE SØRENSEN, PARTNER; MADS ANDERSEN, PARTNER; PER HØHOLT, PARTNER

depth adaptation of expectations with investment partners through a discussion of transparent plans, ambitions and objectives, as well as plans for actions after the investment has been made. Enterprises must be focused on competences creating a competitive edge in the market, and management and owners must agree on a solid and carefully considered strategy and business plan. Partnership is key to collaboration with other shareholders, management and business partners.

Maj Invest Equity has seen a keen interest in portfolio companies and has experienced a large deal flow. In the reporting period, Maj Invest Equity has acted as advisor in connection with the sale of three portfolio companies as well as provided advisory services to Maj Invest Equity 4 K/S on investments in the chain of dental clinics Godt Smil, the design company Muuto and ProLøn, which provides solutions on wage administration. Following the acquisition of these portfolio companies, Maj Invest Equity 4 K/S' portfolio now comprises six companies.

In 2015 continued expansion of the number of portfolio companies in Maj Invest Equity 4 is expected as well as a number of exits from LD Equity 1, 2 and 3.

In 2014 the subsidiary Maj Invest Equity A/S, in which part of the private equity activities take place, obtained approval from the Danish Financial Supervisory Authority (FSA) pursuant to the Act on Alternative Investment Fund Managers and is now subject to the FSA's regulation and supervision.

MAJ INVEST EQUITY INTERNATIONAL

We carry on our international activities under the name of Maj Invest Equity International. Our group acts as advisor to three private equity funds investing in Vietnam, Southeast Asia and within microfinancing.

The experience and expertise gained throughout the years from advisory services on private equity investments in Denmark have also been used internationally. Thus, the investment process is very similar to

 $MAJINVEST\,EQUITY\,INTERNATIONAL\,-\,JOAQUIN\,COSTA, PARTNER;\,KASPER\,SVARRER, PARTNER;\,THOMAS\,RIIS, INVESTMENT\,MANAGER;\,JAKOB\,VESTERGAARD, CORPODITIONAL\,-\,JOAQUIN\,COSTA, PARTNER;\,THOMAS\,RIIS, INVESTMENT\,MANAGER;\,JAKOB\,VESTERGAARD, CORPODITIONAL\,-\,JOAQUIN\,COSTA, PARTNER;\,THOMAS\,RIIS, INVESTMENT\,MANAGER;\,JAKOB\,VESTERGAARD, CORPODITIONAL\,-\,JOAQUIN\,COSTA, PARTNER;\,THOMAS\,RIIS, INVESTMENT\,MANAGER;\,THOMAS\,RIIS, THOMAS\,RIIS, TH$ RATE ATTORNEY; TORBEN KJÆR, PARTNER; MARIANNE SETTNES, GENERAL COUNSEL, HEAD OF LEGAL & COMPLIANCE

NEW STRUCTURE REGARDING POTENTIAL INVESTMENTS IN ENERGY AND FERTILIZER PLANTS In 2012 Maj Invest Equity International established The Energy and Fertilizer Investment Fund K/S together with Danish pension funds with the purpose of investing in energy and fertilizer plants. Locating the right investments has proven to be a longer process than expected. As a consequence it was decided to close the fund at year-end 2014.

We will carry on with the investment concept in a discretionary form as a result of investors showing a continued interest in this type of investment and an interesting deal flow.

the strategy applied in connection with the acquisition and sale of Danish companies and also the value creation process in the holding period. By supplementing these competences with local knowledge, each fund obtains strong competitive power. In addition to Denmark, the group's international private equity activities are also represented in Vietnam, Singapore, Indonesia and Peru.

Our group acts as advisor to LD Invest Vietnam K/S on investments in companies in Vietnam. An attractive and varied portfolio of investments in Vietnamese companies with activities in production, service industries, education and IT has been created. For the majority of investments, value creation is based on growing Vietnamese purchasing power, and for the remaining it is based on exports to international markets. The fund is already fully invested and therefore focus in 2014 has been on further developing and providing advisory services on the sale of portfolio coanies. Hence, in 2014 the group provided advisory services on the first sale of a portfolio company in the fund.

The group's subsidiary Maj Invest Vietnam Management Consultancy LLC provides consultancy to Fondsmæglerselskabet Maj Invest A/S concerning private equity investments in Vietnam. The office consists of four permanent staff members with a large network and profound knowledge of the Vietnamese business environment.

In January 2015 a follow-up private equity fund, Maj Invest Equity Southeast Asia II K/S, was established. The fund will focus on further investments in Vietnam and Indonesia as continued economic growth and attractive investment opportunities are expected in these regions. In this context, the group opened a company in Singapore in 2014, which has set up a representative office in Indonesia. The fund's first closing commitments total USD 90 million.

The group also acts as advisor to Danish Microfinance Partners K/S. This fund invests directly or indirectly in microfinance institutions in Latin America, Asia and Africa. Normally, microfinance institutions are banks offering financial services to a group of clients with no access to the financial services offered by traditional commercial banks. Typical services include savings, insurance and small loans with short maturity. Loans are granted to groups or individual clients.

Our microfinance fund has made a total of six investments; two in India, three in Latin America, and one in Africa/China. In 2014 the fund acquired further shares in one of the portfolio companies.

The fund is expected to get further investment opportunities in 2015, with Latin America being the focus of special attention. In this context, we established Maj Invest South America S.A. in Peru in 2014, and the purpose of the office is to provide consultancy services to the group on microfinance investments.

PERFORMANCE-BASED MANAGEMENT FEE AND BONUS SCHEME IN OUR PRIVATE EQUITY FUNDS As is customary in our sector, the group and our clients, including investors in the private equity funds, have made agreements regarding performance-based management fees/carried interest. Under these schemes Fondsmæglerselskabet Maj Invest A/S - and in the new private equity funds Maj Invest Equity A/S - can, upon agreement, typically receive a performance-based management fee/carried interest in addition to the fixed fee if the individual fund generates excess returns. The fee is usually 20 per cent or higher of that part of the investment return that exceeds an agreed hurdle rate of 8 per cent or higher in average annual return over the total life of the fund or contract.

As part of the fund agreements, Fondsmæglerselskabet Maj Invest A/S has in the early established funds undertaken to use typically 50 per cent of the performance-based management fees on an incentive scheme intended for Maj Invest Equity staff involved in such investments. Fund agreements in the new funds stipulate that Maj Invest Equity staff involved in such investments will receive minimum 50 per cent of the performance-based management fees/carried interest to distribute among them. The time of payment of such fees from the funds to the group varies. Maj Invest Equity staff cannot receive payment from these schemes until certain predefined yield targets have been reached, which is often relatively late in the life of the individual fund.

The size of any performance-based management fees/ carried interest is finally calculated when the individual fund is closed. Thus the fund may be adjusted upwards or downwards throughout its life, depending on the investment returns. As the group cannot be certain to receive any performance-based management fees/carried interest, such fees are recognised as contingent assets. Note 18 to the financial statements includes information on the size of nonrealised performance-based management fees after reserve for bonus schemes and taxes, etc.

AT MAJ INVEST WE ARE FOND OF THE BIRCH TREE AS A SYMBOL. IT GROWS IN THE SAME WAY AS WE VIEW GROWTH - NATURALLY AND DEEPLY ROOTED IN THE GROUND. HOWEVER, THERE IS AN UPPER LIMIT TO EVERYTHING WHICH IS IMPORTANT FOR ALL OF US TO REMEMBER. BUT LESS IS ALSO OKAY AS LONG AS YOU KEEP YOUR FEET ON THE GROUND

SALARY AND REMUNERATION POLICY AND PRACTICE

Once a year the board of directors revises the company's salary and remuneration policy and practice. The board of directors has decided not to appoint a remuneration committee due to the group's size.

The salary and remuneration policy is discussed annually on the basis of a draft made by the CEO, coordinated with the Head of Legal & Compliance and after further instructions from the chairman of the board or the chairmanship. Salary and remuneration practices for the executive board are determined by the chairmanship following a recommendation from the CEO. In all other respects salary and remuneration practices are determined by the executive board and supervised by the chairmanship. The chairman of the board and the Head of Legal & Compliance have asked for legal advice from external advisors on issues relating to salary and remuneration practices whenever needed.

The board of directors receives a fixed remuneration and no variable remuneration or other non-cash benefits.

For the executive board and other employees whose activities have a material influence on the group's risk profile, fixed remunerations reflecting responsibility, qualifications and effort have been agreed. Any variable remuneration falls under a minimum amount of DKK 100,000 and is based on an assessment of the particular person's results, the results of that person's department and the results of the company.

In accordance with the salary and remuneration policies any variable remuneration may amount to up to 50 per cent of the fixed remuneration. This option, however, has not yet become a reality in practice. In addition, contracts include pension schemes with a monthly pension payment of up to 10 per cent of the monthly gross salary. In addition, other benefits are comprised by the agreements such as phone subscription, insurance etc., severance pay of up to two years' pay etc. and competition clauses that may trigger payment if an employee leaves the company.

Before 1 January 2011 some executive board members had contracts involving performance bonus and/or incentive schemes related to performance in specific private equity funds and to specific investment commitments in the same funds.

For a few directors, the executive board and other staff whose activities significantly influence the company's risk profile, a scheme concerning the acquisition of shares in Maj Invest Holding A/S has been set up together with individual schemes concerning the acquisition of warrants in Maj Invest Holding A/S.

Note 8 to the financial statements provides further information on the remunerations and salaries of the board of directors, the executive board and staff whose activities significantly influence the company's risk profile by fixed and variable remuneration.

MANAGEMENT AND OWNERSHIP

Maj Invest Holding A/S is the parent of the Maj Invest group. Fondsmæglerselskabet Maj Invest A/S and Maj Invest Equity A/S carry out a sizeable portion of our activities. The Maj Invest group also consists of a variety of management companies related to the group's activities in the Maj Invest Equity business area.

MANAGEMENT

The board of directors has eight members, three of whom are elected by our staff. The boards of directors of Maj Invest Holding A/S and Fondsmæglerselskabet Maj Invest A/S are identical.

The executive board consists of four people: our CEO, our CFO and two managing directors. These four hold the same positions in Fondsmæglerselskabet Maj Invest A/S and the executive boards of the two companies are therefore identical.

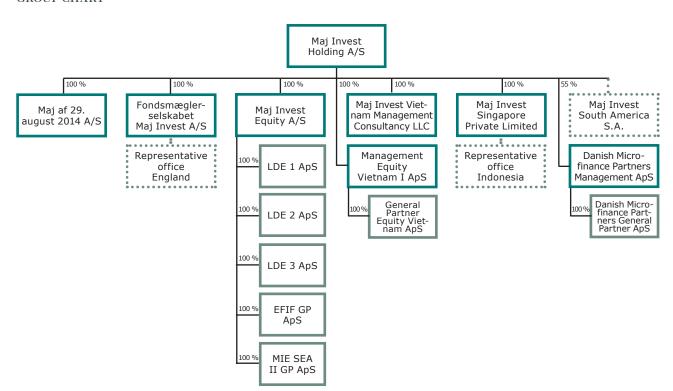

In Maj Invest Equity A/S the board of directors and the executive board consist of individuals from Maj Invest Holding A/S' executive board and board of directors.

Directorships and executive functions of the board of directors and our executive board appear in the chapter headed "Executive functions and directorships".

On the group's website, www.majinvest.com, there is a more detailed description of the group's legal, management and organisational structure.

The board of directors has decided on a 2017 target figure of 20 per cent for the underrepresented gender among the directors elected by the general meeting. The target has been set with a four-year time scale, and at year-end 2014 the board of directors was represented by 20 per cent women as at year-end 2013.

GROUP CHART

The Maj Invest Equity General Partner fund, which is a general partner of Maj Invest Equity 4 K/S, is not included in the group because it is a commercial foundation.

The board of directors of Fondsmæglerselskabet Maj Invest A/S has prepared a policy aiming at increasing representation of the underrepresented gender at other management levels and moreover to encourage diversity. The objective is to continue filling executive positions on the basis of the needed qualifications, but also to encourage diversity where possible. Our long-term goal is to have the company reflect the surroundings and especially our clients in terms of gender, but also in terms of for example nationality and ethnicity. This reflection of our surroundings is positive for the company in terms of being an attractive choice for clients as well as present and future employees in order for the company to reach its commercial objectives.

OWNERSHIP

Corporate employees have currently received an offer to buy shares in Maj Invest Holding A/S. This offer to employees should be viewed as an element in furthering shareholders' common interest as well as in retaining the competencies and qualifications held in our organisation and thus reinforcing staff commitment in a competitive financial group. Our employees now constitute the largest group of shareholders in the company.

In 2011 a group of executive officers and staff were also offered warrants in Maj Invest Holding A/S. To ensure that the risk aspects were sufficiently balanced, we only allowed these staff members to buy warrants if they bought a matching number of shares. This scheme is a retention scheme aimed at creating a shared sphere of interest between the groups of shareholders. We also believe that this scheme promotes a commitment to building a competitive financial group.

Staff members have bought both shares and warrants at market values at the time they were offered, but these purchases do not represent an incentive programme.

At year-end 2014 Maj Invest Holding A/S' shares were held by the groups of shareholders shown below.

KNOWLEDGE RESOURCES

The group's business activities are based on providing

advisory services regarding trading and investing in listed securities and unlisted equity. This puts exacting demands on the qualifications and specialist know-how of our staff.

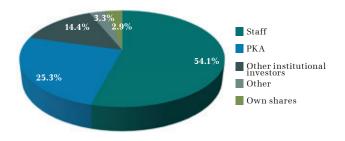

We continuously strive to attract and retain staff with broad experience and professional skills and focus on developing staff competencies. We need this strategy to continue generating excellent results and extend our business basis. A very high share of our staff has expertise in special investment areas.

We have taken various initiatives aimed at making us an attractive workplace and to give our staff competitive salaries consisting of a fixed salary and a bonus scheme calculated on the basis of results achieved on behalf of our clients.

We are convinced that competitive remuneration is a must for attracting and retaining competitive executive officers and staff. An incentive-based remuneration or retention scheme can help promote business development that benefits our company. In our opinion ownership with both management and staff as shareholders boosts value creation.

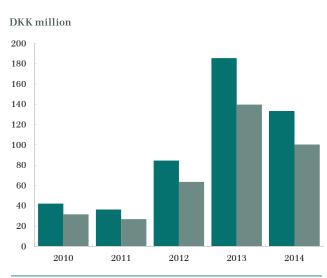

In 2014 the group employed an average of 95 staff members, three more than in 2013. The staff increase is due to a continued favourable development in business activities, including the setting-up internationally.

DISTRIBUTION OF SHARES IN MAJ INVEST HOLDING A/S

TRENDS IN PROFIT

- Profit before tax
- Profix after tax

Consolidated profit before tax amounted to DKK 133.3 million against DKK 185.5 million in 2013. Consolidated net profit after tax totalled DKK 100.4 million against DKK 139.7 million in 2013, resulting in an average return on equity of 21.0 percent. This is considered satisfactory.

Consolidated profit is on level with the original forecast for 2014 announced when we published our annual report 2013, but lower than the upgraded forecast announced when we published our interim statements. The main reason for the upgraded net profit for the year not being realised is lower earnings than expected on performance-based agreements in the second half of the year.

MAJ INVEST HOLDING A/S

Net interest and fee income amounted to DKK $2.9\,\mathrm{mil}$ -lion against DKK $1.7\,\mathrm{mil}$ lion in 2013. The increase relates to the company's bond holdings.

Market value and currency translation adjustments showed a loss of DKK -2.4 million. Equities generated a loss of DKK -4.4 million whereas bonds provided a gain of DKK 0.7 million. The company's foreign exchange positions contributed with a gain of DKK 1.3 million. In 2013 total market value and currency translation adjustments were DKK -0.1 million.

Other operating income, which primarily relates to the company's administration and reporting of private equity funds, showed a decline from DKK 13.3 million in 2013 to DKK 9.7 million in 2014. This is due to a change in the basis of calculation of fees typically five years after establishment of the private equity funds. In addition to this, 2013 included a fee of DKK 1.9 million regarding other one-off services.

Staff costs etc. rose by DKK 4.5 million of which DKK 3.0 million relates to an increase in the company's portion of total costs related to the group executive board compared to earlier years, and the fact that at the general meeting in April it was decided to pay remuneration to the board of directors. This is the first time that the board of directors has received remuneration.

In 2014 administrative costs amounted to DKK 3.6 million against DKK 3.0 million in 2013. The increase can be attributed to a higher activity level in connection with the expansion of the group's strategy and business volume, among other things.

Results of interests in group enterprises amounted to DKK 106.7 million, which is a decline of DKK -31.1 million compared to last year. Most of the results of interests in group enterprises and the development in the results can be attributed to Fondsmæglerselskabet Maj Invest A/S. See "Trends in significant subsidiaries" on the next page for further details.

Shareholders' equity went up by DKK 57.2 million in 2014 with net profit for the year accounting for DKK 100.4 million, but with a negative effect from distri-

buted dividend from prior financial year of DKK 44.0 million. The acquisition and sale of own shares have increased shareholders' equity by net DKK 0.8 million.

The parent's balance sheet amounted to DKK 531.1 million at year-end 2014 against DKK 471.6 million at year-end 2013. A large portion of this development is due to interests in group enterprises.

TRENDS IN SIGNIFICANT SUBSIDIARIES

Fondsmæglerselskabet Maj Invest A/S and Maj Invest Equity A/S are the group enterprises where most of the activities mentioned on pages 9-15 in this annual report take place.

Fondsmæglerselskabet Maj Invest A/S' gross income for 2014 was DKK 277.7 million, which is a decline of DKK 37.8 million. This decline can mainly be attributed to a lower level of performance-related fees. Costs rose 1.2 per cent to DKK 134.7 million. Profit after tax was DKK 108.1 million in 2014 against DKK 136.8 million in 2013. Shareholders' equity amounted to DKK 332.5 million at year-end 2014, and total assets amounted to DKK 445.1 million.

Maj Invest Equity A/S provides administrative and advisory services to a number of private equity funds. The company recorded a profit of DKK 0.4 million in 2014 (2013: DKK 1.0 million). As a consequence of the alternative investment fund manager approval obtained in 2014, the company has increased its capital by DKK 9.5 million. Shareholders' equity was DKK 12.1 million at year-end 2014 (2013: DKK 2.2 million).

Maj Invest Vietnam Management Consultancy LLC resides in Vietnam and acts as a consultant to Fondsmæglerselskabet Maj Invest A/S concerning some of the private equity investment activities in Vietnam. The company recorded a loss of DKK -0.3 million, which is at the same level as in 2013. Shareholders' equity was DKK 0.5 million at year-end 2014 (2013: DKK 0.8 million).

Maj af 29. august 2014 A/S was established in 2014. As a consequence the company has not presented annual accounts. Based on internal financial statements the company recorded a loss of DKK -1.6 million in 2014, and shareholders' equity totalled DKK 8.9 million at year-end 2014.

COMMENTS IN RESPECT OF SELECTED ITEMS IN THE CONSOLIDATED FINANCIAL STATEMENTS Net interest income totalled DKK 9.5 million in 2014 against DKK 7.1 million the year before. In 2013 subordinated debt costs amounted to DKK 3.1 million against DKK 0.2 million in 2014. In 2013 as well as in 2014 subordinated debt was redeemed before maturity.

Net fee income totalled DKK 281.5 million, which is a decline of DKK 37.2 million against DKK 318.7 million in 2013. The decline in net fee income is partly linked to a lower level of performance-related fees. 2013 also included some one-off fees related to pre-closing and final closing of private equity funds to which the group acts as advisor.

In 2013 market value and currency translation adjustments represented a total gain of DKK 8.9 million against DKK 6.4 million in 2013. Bond holdings represented a capital gain of DKK 1.6 million, equities generated a capital gain of DKK 5.4 million, and our currency translation adjustments contributed with DKK 1.9 million.

Staff costs and administrative expenses amounted to DKK 175.6 million in 2014 against DKK 158.0 million in the same period the year before. Payroll-related costs increased by DKK 6.0 million to DKK 116.1 million as a consequence of the group employing more people in 2014 than in 2013, among other things.

Other administrative expenses rose by DKK 12.7 million due to a higher level of activity, including costs in relation to the establishments in four new countries in connection with the expansion of the company's international activities, but also due to group business development costs.

Depreciation charges on intangible and tangible assets totalled DKK -2.3 million, which is down DKK 1.0 million from the 2013 level of DKK -3.3 million.

Group profit before tax aggregated DKK 133.3 million in 2014 against DKK 185.5 million in the same period last year. Tax is estimated at DKK 33.0 million, equivalent to an effective tax rate of 24.6 per cent. Net profit for the year was DKK 100.4 million against DKK 139.7 million in 2013.

Total consolidated assets amounted to DKK 659.5 million. Due from credit institutions rose by DKK 32.4 million to DKK 137.8 million at year-end 2014. The group's bond holdings accounted for DKK 366.0 million, which is at the same level as the year before. Equities and investments in some of the private equity funds to which the group acts as advisor increased by DKK 10.7 million to DKK 90.5 million, primarily due to holdings of shares in international subsidiaries.

At year-end 2014 shareholders' equity amounted to DKK 507.2 million against DKK 450.0 million at yearend 2013. The rise in shareholders' equity of DKK 57.2 million is attributable to a DKK 100.4 million consolidation of net profit for the year. Shareholders' equity was negatively affected by the dividend of DKK 44.0 million distributed in April. Acquisition and sale of own shares in 2014 affected shareholders' equity positively with net DKK 0.8 million.

CAPITAL AND CAPITAL RATIOS

The implementation of the Capital Requirements Directive (CRD IV) only had limited effect on our own funds (capital base) and capital ratio.

Under the new directive, 20 per cent of the group's additional tier 1 capital, equivalent to DKK 2 million, was excluded from own funds. This combined with an already high level of capital and strong liquidity resulted in a redemption before maturity of the additional tier 1 capital in December 2014, authorised by the FSA.

The group's own funds totalled DKK 404.3 million at year-end 2014 against DKK 411.2 at year-end 2013. In note 23 of the financial statements there is a link between shareholders' equity and own funds.

The total capital ratio at group level was 43.8 per cent at year-end 2014. This represents a drop of 4.9 percentage points against year-end 2013, which is mainly to be seen in connection with an increase in group risk exposures (risk-weighted items) from DKK 844.0 million at year-end 2013 to DKK 922.3 million at yearend 2014. The fall is due to an increased level of activity. Thus, credit risk exposures rose by DKK 25.5 million to DKK 256.8 million, market risk exposures increased by DKK 14.7 million to DKK 89.3 million, and operational risk items rose by DKK 39.1 million to DKK 576.2 million.

At year-end 2014 the parent company's own funds totalled DKK 406.7 million against DKK 404.5 million at year-end 2013. The capital ratio was 79.8 per cent against 90.8 per cent at year-end 2013. The decline is due to an increase in total risk exposures as a consequence of a higher activity level.

The group as well as parent company both have own funds, which are considerably higher than the minimum requirements set by the board of directors.

The trend in the group's risk exposures and capital ratio appears from the next page.

CORPORATE RISKS

As a financial business the group undertakes various risks relating to credit, market, liquidity and operations. Risk management is a crucial activity given the full attention of management because uncontrolled development of such risks could adversely impact consolidated profit and the level of capital.

For a detailed description of corporate risks we refer to note 26 (Financial instruments and risks) and our website, www.majinvest.com, which discloses financial information in compliance with the Capital Requirements Regulation (CRR).

DISTRIBUTION OF PROFIT

The directors recommend that the general meeting approves payment of dividend of DKK 1 per share of DKK 1, equivalent to DKK 45.4 million for the financial year 2014. Furthermore it is recommended to transfer the remaining DKK 54.9 million to next year.

OUTLOOK FOR 2015

The effect of recent years' expansion of our international activities is expected to be reflected in an increase in revenue from abroad. During 2015 we expect to launch advisory services to a new microfinancing fund. The date of establishment and the size of a new microfinancing fund will affect the group's revenues and thus earnings.

We expect 2015 costs to be at a somewhat higher level than in 2014 due to an expansion of our business volume over the year and expected establishment of a third group business area in 2015. However, only

modest revenues are expected in this area in 2015. The costs for development of a new business area are uncertain and difficult to forecast, and this is also the case when it comes to the date of actual launch. This will impact consolidated profit.

Generally, it is difficult to make 2015 forecasts as a sizeable portion of group revenues are variable. Group revenues depend more and more on total assets under management. The trend in the financial markets, the returns generated on behalf of clients, and the development in the number of clients all affect the group's consolidated revenue and thus consolidated profit.

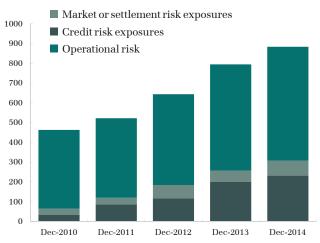

The level of performance-based fees is also uncertain and difficult to forecast, and lower-than-estimated fees will impact the forecasted consolidated profit.

Overall, we forecast net profit after tax for 2015 to range between DKK 45 and 65 million, including performance-based fees.

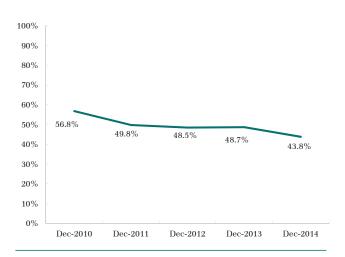

EVENTS AFTER THE BALANCE SHEET DATE No events after the balance sheet date and until the signing of the annual report are thought to materially affect the assessment of the annual report.

THE FINANCIAL MARKETS

TREND IN 2014

In the USA, key economic indicators in early 2014 were disappointing, partly as a result of unusually severe winter weather, but the setback was quickly replaced by renewed progress. However, to investors this progress was for periods of time overshadowed by the uncertainty surrounding China's and Europe's growth prospects and any consequences such economic downturn would have on US growth.

In addition, there were further elements of uncertainty in the form of the Federal Reserve Bank's phasing out of QE (the central bank's large-scale bond-buying programme), geopolitical concerns and also for a period the US media's very strong exposure of the ebola epidemic. Of course, investors' fears are real; however, in Maj Invest's opinion they are also often overstated.

The slowdown in China reflects a significant loss of competitive power, eroding China's ability to export the country out of its structural savings surplus. This does not represent a challenge to Western industrialised countries; on the contrary, it helps support growth in Western countries.

We see the downturn in Europe as temporary, arising as a consequence of failing sales in export markets, but here the downturn is now a closed chapter. Economic trends in the home market industry, including the domestic subcontractors of export industry, typically lag a couple of months behind compared to the economic trend in export, and they still suffer from the aftermath. The European Central Bank's (ECB) response to this weakened economic climate was a QE programme involving the acquisition of certain types of private debt; however, from March 2015 the ECB will expand the programme to include the acquisition of government debt. This decision was made in January 2015.

It is fair to assume that one of the ECB's primary objectives with the initiative has been to weaken the euro, and in this light the programme can so far be considered a success. Measured vis-à-vis Danish kroner, the US dollar rose 13.4 per cent in 2014. Towards the end of the year, the oil price fell significantly to USD 55 a barrel at year-end from slightly above USD 100 in the period up to mid-August.

The US equity index S&P 500 rose 11.4 per cent (26.3 per cent in DKK) during 2014, while the German DAX index rose 2.7 per cent, and the Danish C20 index rose 21.0 per cent.

After a large relative downturn in 2013, the so-called emerging markets equities performed sligthly better in 2014, even though Morgan Stanley's emerging markets index still fell 4.6 per cent throughout 2014. In DKK this corresponds to an increase of 8.2 per cent.

At year-end 2014, the yield on a 10-year US government bond was 2.17 per cent, which was 0.86 percentage points below the level at year-end 2013. The corresponding German yield was 0.54 per cent; 1.39 percentage points below the year-end 2013 level. At the same time the yield spreads between Germany and countries such as Spain and Italy were 1.15 and 0.85 percentage points lower than at the start of the year, respectively.

OUTLOOK FOR THE FINANCIAL MARKETS IN 2015 In our opinion, there is still a risk that the confrontation between Russia and the West over Ukraine will escalate. In addition, there is some uncertainty as to the shortterm trend in US key economic indicators. At present a considerable build-up of inventories is taking place, and if this trend suddenly stops, important key indicators will disappoint for a period of time.

Basically we believe that general economic progress will continue and gradually gain strength. Overall, the considerable drop in oil prices will overall contribute to this trend, in our opinion.

Especially when it comes to Europe there is a good chance that the economy will develop favourably relative to investors' current expectations. Banks are now less aggressive in terms of reducing their balance sheets, resulting in a general pick-up in domestic demand.

In the USA, there is a risk of increasing upward pressure on wages. It is a widespread belief that the large drop in the unemployment rate exaggerates the actual tightening of the labour market, but other indicators also show signs of incipient upward pressure on wages.

The market is expecting a very slow normalisation of the monetary policy rates in the USA. If the market at some point starts expecting a more rapid normalisation, it may cause interest rates to rise considerably.

However, there is room for patience on the part of the central bank in light of the disinflationary effect of the drop in oil prices. Europe is facing a risk of considerable interest rate increases if the economy shows positive signs.

Potential interest rate increases may also lead to increased volatility in equity markets. However, at the same time it is our assessment that the actual pricing of the equity market continues to leave room for a general pickup in prices.

STATEMENT OF CAPITAL - PARENT

The company's share capital consists of 45,437,820 shares of DKK 1 (2013: 45,437,820).

At year-end 2014, the company had 3,863,500 outstanding warrants (2013: 3,863,500) entitling holders to acquire a share either through the company's holding of own shares or through the issue of new shares. Issued warrants may be exercised in two annual periods, first period in September 2013 and last period in September 2016. The strike price of the issued warrants is the fair value of the underlying assets at the time of issue with the addition of the official discount rate computed on a month-by-month basis.

Own shares	Sł	In per cent	
2014	Number	Nom. value	of capital
Own shares 1 January	1,365,375	1,365,375	3.0%
Acquisition of own shares	416,800	416,800	0.9%
Sale of own shares	(481,000)	(481,000)	(1.1%)
Own shares 31 December	1,301,175	1,301,175	2.8%

Own shares were acquired in connection with employees leaving our employment. Own shares were sold in connection with the recruitment of staff. The net value of the annual acquisition and sale of own shares was DKK 733,000.

Own shares	S	In per cent	
2013	Number	Nom. value	of capital
Own shares 1 January	7,813,530	7,813,530	17.2%
Acquisition of own shares	98,660	98,660	0.2%

Own shares 31 December	1,365,375	1,365,375	3.0%

Own shares were acquired in connection with employees leaving our employment. Own shares were sold in connection with the recruitment of staff and an extraordinary offer made to corporate employees and a few large shareholders. Own shares were also $sold\ in\ connection\ with\ a\ few\ employees\ exercising\ their\ warrants\ in\ the\ company.\ The\ net\ value\ of\ the\ annual\ acquisition\ and$ sale of own shares was DKK 59,597,000.

Note 1 Accounting principles

GENERAL

The annual report, which comprises the group and its parent Maj Invest Holding A/S, has been prepared in compliance with the Danish Financial Business Act including the Executive Order on Financial Reporting by Credit Institutions and Investment Companies etc. and the guidelines issued by the Danish Financial Supervisory Authority.

Our accounting policies are the same as last year.

Consolidation

The consolidated financial statements comprise the parent Maj Invest Holding A/S and the entities, in which the parent directly or indirectly holds more than 50% of the voting rights, or in which the parent has a controlling interest through its holdings of shares or in some other manner.

The consolidated financial statements are prepared by aggregating uniform income, costs, assets and liabilities. Intra-group income and expenses, accounts and intra-group profit or loss arising from transactions between consolidated entities are eliminated.

The financial statements included in the consolidated financial statements have been prepared in compliance with the group's accounting policies.

The parent's interests in consolidated subsidiaries are eliminated against the parent's share of the particular subsidiary's equity value.

Recognition and measurement

All income and expenses relating to the reporting period are recognised in the income statement regardless of time of payment.

Assets are recognised in the balance sheet, if, in all probability, future economic benefits will flow to the company, and the values of such assets can be measured reliably.

Liabilities are recognised in the balance sheet, if, in all probability, future economic benefits will flow out of the company, and the values of such liabilities can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Measurement of assets and liabilities after initial recognition is made as described below for each accounting item.

Recognition and measurement of assets and liabilities have taken into account any information available after the balance sheet date but before the presentation of the annual report, either affirming or not affirming conditions existing on the balance sheet date.

Foreign currency

Transactions in foreign currency are translated into Danish kroner at the exchange rates prevailing on the transaction date.

Monetary items in currencies other than Danish kroner are translated into Danish kroner at the closing rates of the particular currencies on the balance sheet date.

Note 1 cont.

Non-monetary items in currencies other than Danish kroner recognised at cost are translated into Danish kroner at the exchange rates on the transaction date.

Non-monetary items in currencies other than Danish kroner recognised at fair value are translated into Danish kroner at the closing rates on the balance sheet date.

Any foreign currency translation adjustments are recognised in the income statement. Any foreign currency translation adjustments relating to foreign entities are recognised in other comprehensive income.

Derivatives

On initial recognition, derivatives are recognised at cost in the balance sheet and subsequently measured at fair value. Any changes in the fair values of derivatives are recognised currently in the income statement.

Intra-group transactions

Securities are traded and consultancy fees charged at market prices. Other intra-group services are settled on a cost-covered basis.

Translation of results of foreign entities

The profits or losses of foreign associates or subsidiaries are translated at the rates on the transaction date or corresponding average rates.

Balance sheet items are translated at the rates on the balance sheet date. Any foreign currency translation adjustments arising from the translation of equity at the beginning of the year and any currency translation adjustments arising from the translation into Danish kroner (DKK) of profits or losses of foreign entities' functional rates are recognised directly in other comprehensive income.

Tax

Tax on the year's results consisting of current tax and deferred tax for the reporting period is recognised in the income statement with the portion that is attributable to the results for the year and directly via equity with the portion that is attributable to equity transactions. Any changes in deferred tax due to tax rate adjustments are recognised in the income statement.

Provisions are made for both current and deferred taxes for the period under review in respect of the jointly taxed consolidated entities. The company is jointly taxed with all its subsidiaries residing in Denmark. The tax effect of joint taxation is allocated to profit or loss in the consolidated entities in proportion to their taxable incomes. The jointly taxed entities are included in the Danish tax prepayment scheme.

Provisions for deferred tax on any temporary differences between the tax base of assets and liabilities and their carrying amounts are measured using the balance-sheet liability method. If a temporary difference is negative, a deferred tax asset will be recognised if, in all probability, it can be applied to reduce any future tax liability.

Any deferred tax is measured in compliance with current tax rules and at the tax rate likely to be applicable once any temporary differences have been eliminated. Any deferred tax assets or liabilities are presented after offsetting in the same legal entity.

Note 1 cont.

INCOME STATEMENT

Interest, dividends, fees and commissions

Interest, fees and commissions are accrued and recorded in the period they are earned and recognised in the income statement at the amounts relevant to the period under review.

Dividends are recognised in the income statement at the time of declaration or on the distribution of interim dividends.

Performance-related investment management fees/carried interest are recorded as income at the time when the company will be entitled to such fees. Until entitlement, such fees are mentioned under "Contingent assets".

Fees and commissions received will include income from services vis-à-vis clients.

Market value adjustments

Any differences between the fair values and the carrying amounts of securities are recognised as market value adjustments.

Other operating income

Other operating income includes items of a nature secondary to the company's core activity, including fees from entities for which we carry out administrative tasks. Other operating income is accrued when earned and recognised in the income statement at the amounts relevant to the period under review.

Staff costs and administrative expenses

Staff costs and administrative expenses include salaries and pensions, rent, computer software, legal and audit fees, and any other administrative expenses.

Results of interests in associates and group enterprises $% \left(x\right) =\left(x\right)$

The proportionate shares of net profits or losses for the reporting period in associates and group enterprises are recognised as results of interests in associates and group enterprises.

BALANCE SHEET

ASSETS

Loans and receivables

Loans and receivables are recognised at amortised cost. Loans and receivables are not held for trading purposes and only include loans where the borrower has no contractual right to repay the loan with tradable bonds issued by the company.

Securities

Securities are recognised at their fair values. The fair values of listed securities are their closing rates on the balance sheet date. The fair values of listed bonds are their present values. The fair values of unlisted investments are the transaction prices that would result from a trade between independent parties. The settlement date is used as the date of recognition. Any change in value between the trade date and the settlement date is recognised as a financial asset or a financial liability.

Note 1 cont.

Interests in associates and group enterprises

Interests in associates and group enterprises are recognised and measured using the equity method. The proportionate interests in the equity values of associates or group enterprises computed on the basis of the fair values of identifiable net assets at the time of acquisition are recognised in "Interests in associates and group enterprises".

Through the distribution of profit, the total net revaluation of interests in associates and group enterprises is transferred to the reserve fund for net revaluation using the equity method and recognised in statutory equity reserves. Reserves are reduced by payments of dividends to the parent and adjusted for other movements in the equity capital of subsidiaries.

On the translation of the results of foreign entities, any foreign currency translation adjustments are recognised in other comprehensive income.

Intangible assets

Our intangible assets consist of a trading system, a portfolio management system and computer software. Intangible assets are measured at cost with the deduction of any amortisation or impairment losses. These assets are amortised on a straight-line basis over their estimated useful lives or over the relevant contractual periods:

- Trading system : 60-90 months - Software and portfolio management system : 24-36 months

Other tangible assets

Other tangible assets are measured at cost with the deduction of any depreciation or impairment losses. These assets are depreciated on a straight-line basis over their estimated useful lives:

- Computer equipment : 36 months - Furniture, fixtures and equipment : 36 months

Recoverable amounts

The carrying amounts of intangible assets and other tangible assets are reviewed annually to determine whether there is an indication for impairment in addition to any depreciation or amortisation charges. If so, an impairment test will determine whether the recoverable amount is lower than the carrying amount, and the asset will subsequently be recorded at the lower recoverable amount. The recoverable amount of an asset is calculated as the higher of its net selling price or its value in use.

Other assets

Income falling due after year-end and any interest receivable will be recognised in other assets. Any significant amounts receivable and falling due more than 12 months after the period in which they were earned are discounted at their present values on the balance sheet date. The discounting rate used matches the market rate of return of the particular amounts receivable.

 $Any \ positive \ fair \ values \ of \ derivatives \ including \ spot \ transactions \ are \ recognised \ in \ other \ assets.$

Prepaid expenses

Prepaid expenses incurred on or before the balance sheet date, but concerning subsequent reporting periods are recorded as prepayments. Prepaid expenses are measured at cost.

Note 1 cont.

LIABILITIES

Other liabilities

Other liabilities are measured at their net realisable values.

Expenses falling due after year-end and any interest payable are recorded in other liabilities. Any negative fair values of derivatives including spot transactions are recognised in other liabilities.

Accrued income

Income received on or before the balance sheet date, but concerning subsequent reporting periods are recorded as accrued income. Accrued income is measured at cost.

Provisions

A provision is a liability that is uncertain in terms of amount or timing. A provision is recognised in the balance sheet, if, in all probability, future economic benefits will flow out of the company, and the value of such provision can be reliably measured.

The values of any future liabilities are measured at their present values to the extent that the discounting of such liabilities is of significance to the measurement of the size of the particular provision. The discount rate used matches the market rate of return in respect of the liability in question.

Shareholders' equity

Premiums in respect of issued options or warrants and any redemption of options or warrants in respect of corporate shares are recognised in other reserves as movements in equity.

Any obligation to buy back shares in the event of an employee leaving the company's employment is deducted from equity and recorded as debt in other liabilities. The debt is computed at the amount of shares that the company is obliged to buy back in compliance with the shareholders' agreement duly considering the capital requirements of the group and the company.

Any purchases or sale of own shares are recognised directly at the transaction value and recognised as a change directly in equity via "Other reserves".

Any proposed dividends are recognised as a liability at the time of adoption at the annual general meeting (time of declaration). Dividends to be paid for the period under review will be recorded as a separate item in shareholders' equity.

Note 18 Contingent assets

Fondsmæglerselskabet Maj Invest A/S has made a number of investment management agreements involving payment of a performance-based management fee/carried interest. This means that if a return exceeds an agreed level, Fondsmæglerselskabet Maj Invest A/S will earn a share of such return by way of a performance-based management fee/carried interest. Such fees are typically computed on a quarterly basis and may also fall due for quarterly payment. However, the payment of such fees cannot exceed the fee to which Fondsmæglerselskabet Maj Invest A/S is certain to be entitled.

 $At 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ to\ approx.\ DKK\ 214\ million\ (at\ 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ to\ approx.\ DKK\ 214\ million\ (at\ 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ to\ approx.\ DKK\ 214\ million\ (at\ 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ to\ approx.\ DKK\ 214\ million\ (at\ 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ to\ approx.\ DKK\ 214\ million\ (at\ 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ to\ approx.\ DKK\ 214\ million\ (at\ 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ to\ approx.\ DKK\ 214\ million\ (at\ 31\ December\ 2014, our\ performance-based\ fee/carried\ interest\ amounted\ intere$ ber 2013: approx. Note 25 Related parties and ownership

Other related parties

The group's related parties include the members of our board of directors and our executive board and their related family members. Related parties also comprise companies in which the persons mentioned above hold significant interests. The chairman of the board of directors is the CEO of Chr. Augustinus Fabrikker Aktieselskab, which is a client of Fondsmæglerselskabet Maj Invest A/S. All services are settled on an arm's-length basis. The vice chairman is the $CEO\ of\ PKA\ A/S,\ which\ administers\ pension\ funds\ and\ which\ is\ a\ shareholder\ of\ Maj\ Invest\ Holding\ A/S,\ and\ a\ client$ of Fondsmæglerselskabet Maj Invest A/S. Agreements have been made for providing investment consultancy services etc. on an arm's-length basis.

The group has not raised any loans or provided any security, collateral or guarantees on behalf of executive board members, directors or their related family members, or companies in which they hold significant interests.

The chairman of the board, member of the board Peter Korsholm and the three directors elected by staff own shares in Maj Invest Holding A/S. The executive board and/or companies in which executive board members hold significant interests own shares and warrants in Maj Invest Holding A/S.

Ownership

In compliance with the Danish Companies Act, sections 55 and 56, the following shareholders have been entered in the company's register of shareholders as holding minimum 5 per cent of the company capital or minimum 5 per cent of the voting rights of the company capital (not adjusted for own shares):

Jeppe Christiansen and Emlika ApS, which is owned by Jeppe Christiansen, both Virum Erik Holm and Erik Holm Holding ApS, which is owned by Erik Holm, both Hellerup Realdania, Copenhagen

Note 26 Financial instruments and risks

Objectives and risk policies

The board of directors has provided guidelines in respect of the types of risk that the group may be exposed to. These guidelines include identification, management, control and reporting of risks. The guidelines are supported by a number of routines and in the subsidiaries Fondsmæglerselskabet Maj Invest A/S and Maj Invest Equity A/S also by a number of business procedures. Moreover the directors of Fondsmæglerselskabet Maj Invest A/S and Maj Invest Equity A/S have in addition formulated corporate policies relevant to the companies relating to market risks, liquidity, credit, insurance cover of risks, and operational risks. Together with the corporate policies established by the subsidiaries Fondsmæglerselskabet Maj Invest A/S and Maj Invest Equity A/S the guidelines and procedures constitute the group's risk policy. Our risk policy includes a decentralised function identifying risks at various levels in the group enabling a current assessment of any consequences as well as ensuring that the group's capital and capital ratio requirements always comply with statutory requirements and identified risks.

To ensure efficient management of our risk policy, we have segregated the function in charge of business and the function responsible for managing and monitoring the various types of risk.

Market and liquidity risks

The group's market risks are related to our activities in Markets in Fondsmæglerselskabet Maj Invest A/S and to the group's surplus liquidity investments.

The directors have set up a general framework in respect of market risks.

The framework for investing consolidated liquidity is wide in areas where the risk is considered small and narrow in less liquid areas of investment and/or investments involving larger credit risks. The framework is used in combination with the positive lists drawn up by the directors as regards approved financial institutions and countries. Exposures outside these positive lists have a higher risk weighting and a lower investment frame than do exposures on the positive lists. This helps reduce the market risks and ensure that we have liquid assets in the form of a large holding of securities that are easily realisable.

Liquidity risks

The group's liquidity must always be sufficient. We have a framework determining the portion of consolidated liquidity that may be placed in fixed-term deposits and the maximum term.

Although our liquidity risk is considered insignificant due to our generally very large surplus liquidity, the directors of Fondsmæglerselskabet Maj Invest A/S have drawn up a liquidity plan (emergency plan) for any liquidity crises. This plan may also be applied at group level.

Interest rate risk

This risk is a result of the investments of consolidated surplus liquidity in the form of deposits in financial service in-

Note 26 cont.

stitutions and bond markets. The directors have set up a maximum framework in respect of our interest rate risk on bond portfolios and a total interest rate risk for the group as a whole. A very large portion of our investments are short $term\ investment.\ Interest\ rate\ risks\ are\ modest\ compared\ with\ shareholders'\ equity\ and\ our\ own\ funds.$

Interest rate risks	Gr	oup		Parent
	31.12.2014	31.12.2013	31.12.201	4 31.12.2013
Interest rate risks (DKK thousand)	2,488	3,242	44	3 427
In % of year-end shareholders' equity	0.5%	0.7%	0.1%	0.1%
In % of year-end own funds	0.6%	0.8%	0.1%	0.1%

In the current management and monitoring of interest rate risks, we use a duration model based on the Danish FSA's guidelines.

Equity risks

The framework in respect of equity risks are limited by positions in single equities, types of equities including mutual funds and a total limit on equity exposures.

The widest framework is in listed equities and mutual funds to take into account our activities in Markets in Fondsmæglerselskabet Maj Invest A/S.

 $Via \ separate \ investment \ frameworks, the \ group \ can \ also \ invest \ in \ private \ equity \ products \ for \ which \ the \ group \ acts \ as$ investment advisor. This provides investors with a high degree of corporate commitment concerning the products we offer. The group's holdings of interests in listed Danish equities and mutual funds, foreign equities and mutual funds as well as unlisted investments are seen below.

 $Currency \ risks \ relate \ to \ our \ liquidity \ investments \ in securities \ and \ increasingly \ to \ the \ group's \ activities \ abroad \ as \ a$ consequence of the international strategy defined with a view to selling selected products to international clients.

Forward exchange contracts are used for hedging of certain positions.

We have a moderate framework for unhedged for eign exchange positions, and a framework for currency positions and a framework for currency positions are consistent to the contract of the cons combined with foreign exchange hedging. This provides an upper limit for currency positions even if risks are hedged.

As a result of the Danish fixed rate policy vis-a-vis the euro, we do not have any framework as regards the euro.

The group's currency risk is limited and shown in the table below.

Exhange rate risks	Gr	oup	P	arent
	31.12.2014	31.12.2013	31.12.2014	31.12.2013

In % of year-end shareholders' equity	0.8%	0.7%	0.4%	0.5%
In % of year-end own funds	1.0%	0.7%	0.5%	0.6%

^{*}Change of 2.25% for EUR and 12% for other currencies.

Counterparty risk

 $our \ own \ portfolios. \ Our \ counterparties \ are therefore \ other securities \ brokers \ or \ market \ participants \ and/or \ clients.$ Transactions in Markets are exclusively spot transactions. Trade in listed derivatives is limited and exclusively for our own portfolios.

Note 26 cont.

Credit risk

The group's credit risks concern receivables from clients and market and liquidity-related transactions. Our credit risks are subject to a framework given by the board of directors. The size of our credit risk framework is lower than the framework allowed by law both as regards individual transactions and the group's overall credit exposure.

Our clients are institutional investors and financially solid clients. Many of our clients pay in advance and clients that do not, are regulated by fixed and short intervals. Our credit risk in respect of clients is considered insignificant.

The framework for the group's market and liquidity-related transactions is set up so that it is wider where the risk is considered smallest and narrower for less liquid investments and/or investments involving higher credit risk. The directors have drawn up positive lists of approved financial institutions and countries for investment in money and bond markets. The framework is restricted in respect of exposures with financial counterparties that are not on the positive lists.

Reporting and monitoring of risks

The group's financial positions are recorded in a trading system for activities in Markets in Fondsmæglerselskabet Maj Invest A/S and a standard portfolio system for our own positions not related to our trading activities in Markets.

We have invested substantial resources in computer systems for the management and identification of risks in order to currently monitor and control such risks.

Accounting & Risk Management and Middle Office have online access to our trading system and are able to see all transactions and positions in the system. The trading and finance systems are integrated, the latter being responsible for bookkeeping of transactions.

 $\label{thm:middle} \begin{tabular}{ll} Middle Office administers a portfolio management system, which includes transactions and positions in respect of our own portfolio activities not associated with Markets. \\ \end{tabular}$

Control, reconciliation and bookkeeping are made on a day-to-day basis in both computer systems and checked against the company's finance system. Transactions are recorded and reconciled to the settled transactions and the group's custody accounts in external banks and bank accounts.

We also regularly check the prices of positions which the group has with external parties such as depository banks, stock exchanges or similar institutions.

Based on the risk management module of our trading system and withdrawals from accounts and custody accounts, a daily report is prepared showing earnings, positions, risks and utilisation of lines concerning the Markets activities of Fondsmæglerselskabet Maj Invest A/S. This report is submitted to Markets and the executive board of Fondsmæglerselskabet Maj Invest A/S.

 $\label{lem:middle} \begin{tabular}{ll} Middle Office delivers currently reconciled data from the portfolio management system to Accounting \& Risk Management, which monitors the corporate investment framework. \\ \end{tabular}$

On the basis of data from the trading system, the portfolio management system and extracts from our finance system, Accounting & Risk Management currently reports to the executive board on the overall market, credit risks and liquidity. Directors receive reports once every three months.

STATEMENT BY MANAGEMENT

The board of directors and the executive board have today considered and approved the annual report for Maj Invest Holding A/S for the year ended 31 December 2014.

The board of directors and the executive board hereby declare that we are of the opinion that:

- The consolidated financial statements have been prepared in accordance with the Danish Financial Business Act and the company's articles of association.
- The financial statements give a true and fair view of the group's and the parent's assets, liabilities and financial position at 31 December 2014 and of the results of the parent's and the group's activities for the 2014 financial year.
- The management's review includes a fair report of developments in the parent's and the group's activities and financial position and describes the significant risks and any uncertainty factors that may affect the parent or the group.

The annual report will be submitted to the general meeting for approval.

INDEPENDENT AUDITORS' REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS AND THE PARENT COMPANY FINANCIAL STATEMENTS

We have audited the consolidated financial statements and the parent company financial statements of Maj Invest Holding A/S for the financial year 1 January – 31 December 2014. The consolidated financial statements and the parent company financial statements comprise income statement, statement of comprehensive income, balance sheet, statement of changes in equity and notes for the Group as well as for the parent company. The consolidated financial statements and the parent company financial statements are prepared in accordance with the Danish Financial Business Act.

MANAGEMENT'S RESPONSIBILITY FOR THE CONSOLIDATED FINANCIAL STATEMENTS AND THE PARENT COMPANY FINANCIAL STATEMENTS

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with the Danish Financial Business Act and for such internal control that Management determines is necessary to enable the preparation of consolidated financial statements and parent company financial statements that are free from material misstatement, whether due to fraud or error.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the consolidated financial statements and the parent company financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing and additional requirements under Danish audit regulation. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance as to whether the consolidated financial statements and the parent company financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements and the parent company financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the consolidated financial statements and the parent company financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Company's preparation of consolidated financial statements and parent company financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion

on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Management, as well as evaluating the overall presentation of the consolidated financial statements and the parent company financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit has not resulted in any qualification.

OPINION

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the Group's and the parent company's financial position at 31 December 2014 and of the results of the Group's and the parent company's operations for the financial year 1 January – 31 December 2014 in accordance with the Danish Financial Business Act.

STATEMENT ON THE MANAGEMENT'S REVIEW

Pursuant to the Danish Financial Business Act, we have read the Management's review. We have not performed any further procedures in addition to the audit of the consolidated financial statements and the parent company financial statements. On this basis, it is our opinion that the information provided in the Management's review is consistent with the consolidated financial statements and the parent company financial statements.
